

My report

Samuel AG

My report on the dataset by Nigro et al.

```
dt <- read_csv(here("data/data_clean.csv"))
```

The general average fruit count is 74.3490935.

```
ggplot(dt, aes(stem_cm, count, color = seed_maturation_timing)) +  
  geom_point() +  
  scale_y_log10()
```
